

RING SIZER

- Cut out ring sizer below. (For precise results this document must be printed at actual size. In your print dialog box, make sure that shrinking and expansion options are turned off.)
- Cut slit through the dotted line. (Marked "B")
- Insert the narrow end of the strip (Marked "A") through the slit (Marked "B"), forming a circle. As shown in figure 1.
- Place your finger inside the ring sizer and then pull snugly.
- Your ring size is the number that is closest to the slit (Marked "B").

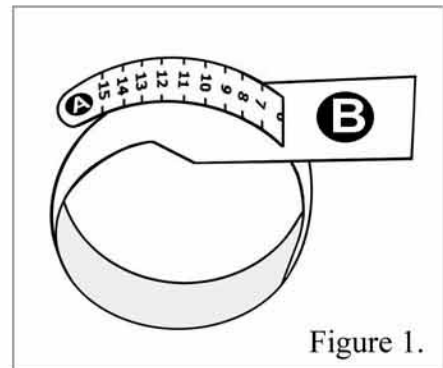

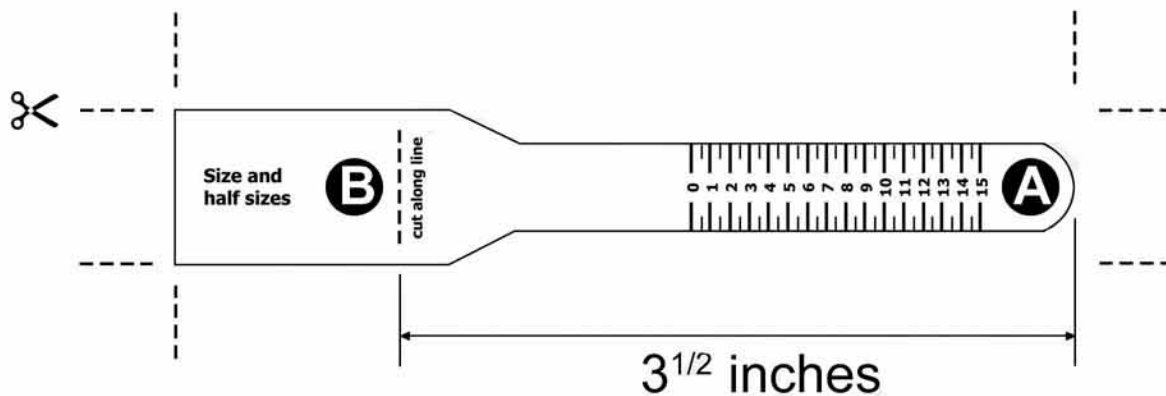

Figure 1.

The example above shows a size 6 ring size.

MEASURE YOUR RING

Place your own ring over the circles below. The black edge of the circle should barely be visible through the ring's inner circumference.
